# WELL... WHAT'S OUR APP ABOUT?

During our work we had the objective to learn and showcase the true potential of Apex app builder.

Utilizing this tool, we were able to build a habit tracking app. We are excited to show you our special and unique approaches that resulted in the making of this project.

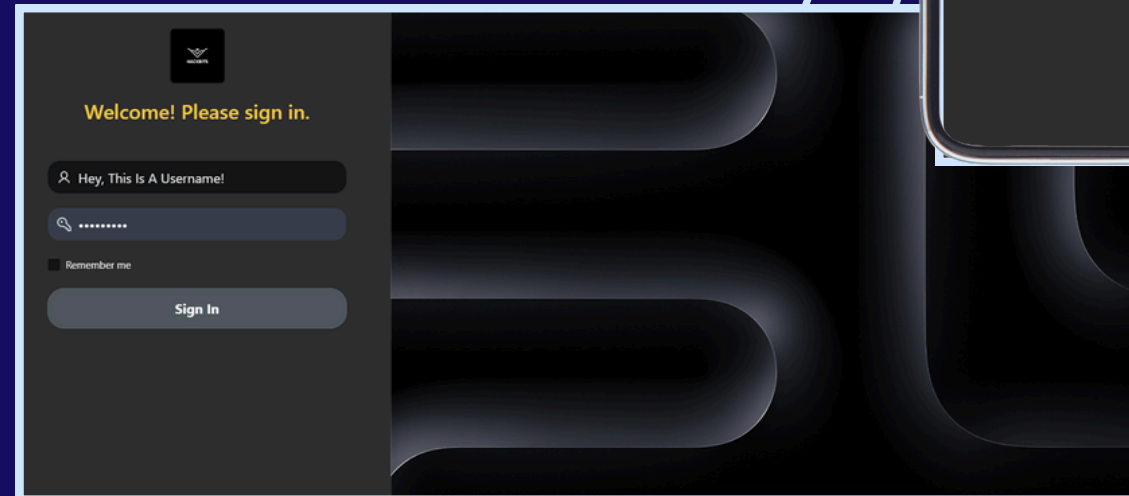

# OUR FEATURES

- Log in - Log out
- Home page with dashboard
- Calendar
- To-Do list
- Analytics page

# WELL, HOW ABOUT WE “LOG IN”

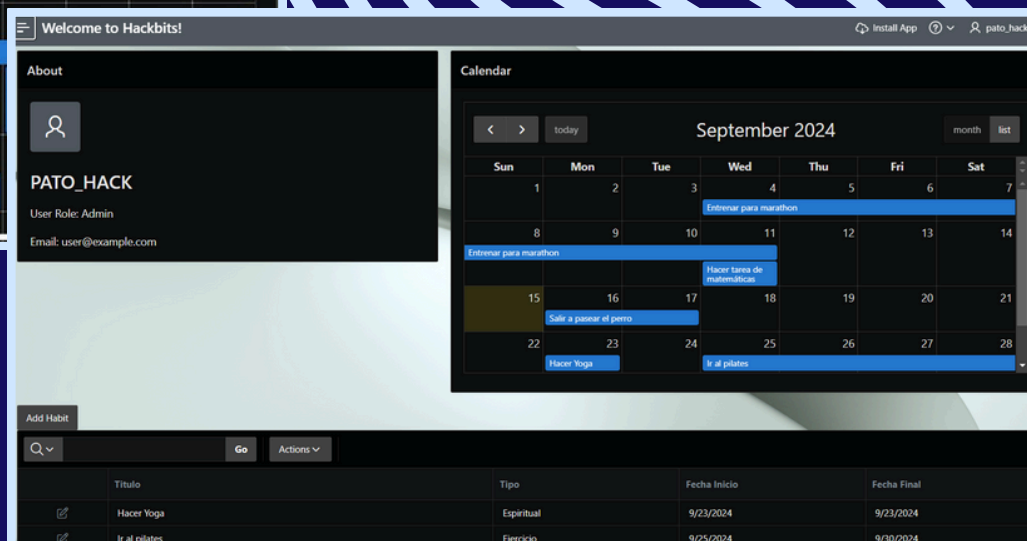

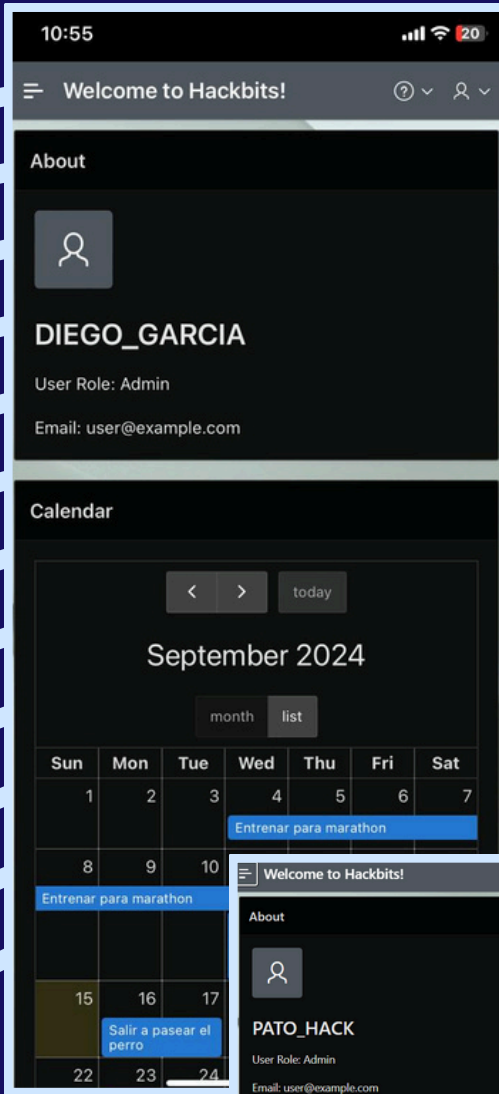

Utilizing apex's pre built features we were able to quickly and effectively design and construct our back-end features. This allowed us to put even more effort in the front-end aspect of our application.

# WELCOME HOME

This is the first thing you'll see once you enter our app. We wanted to showcase all of the important information in a compact and well organized manner.

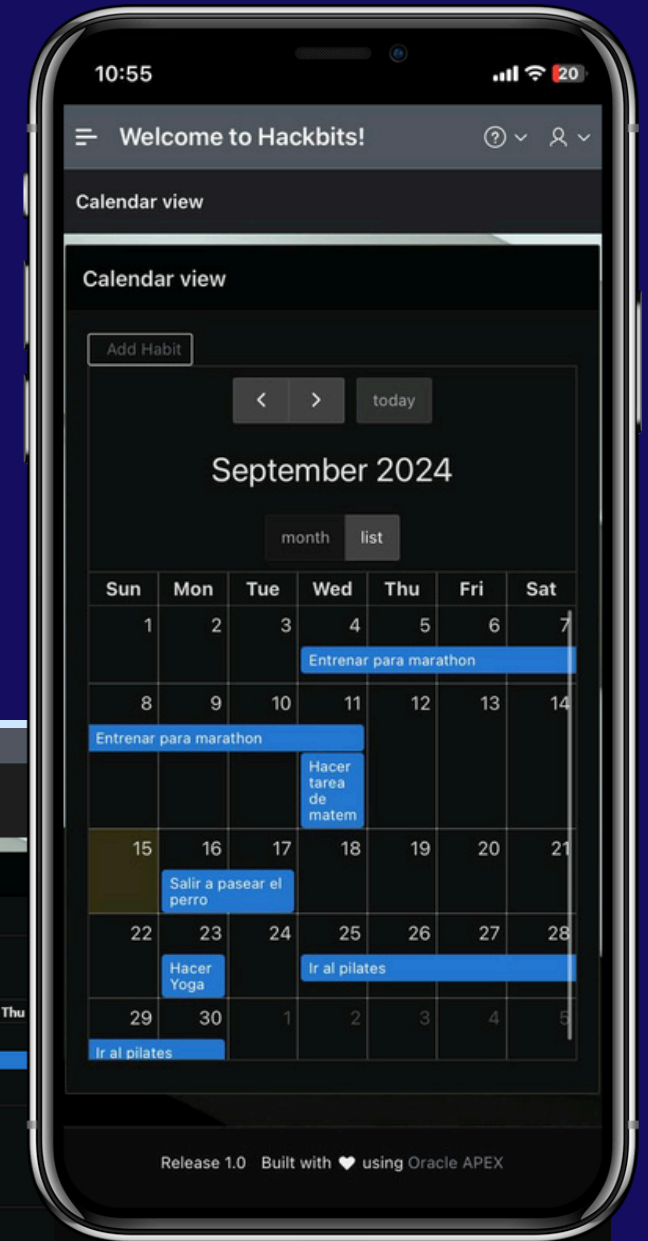

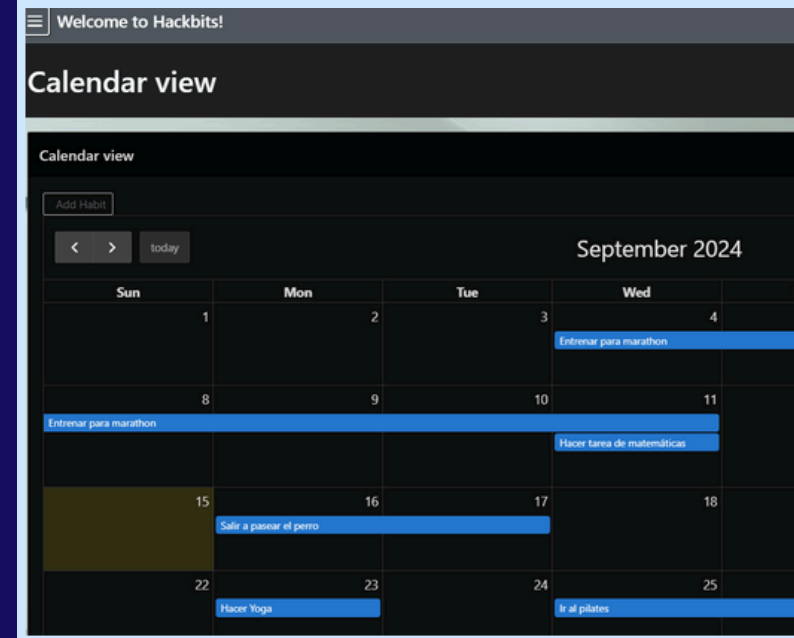

Our users will have easy acces to their profile, celendar and their To-Do lists.

# CALENDAR

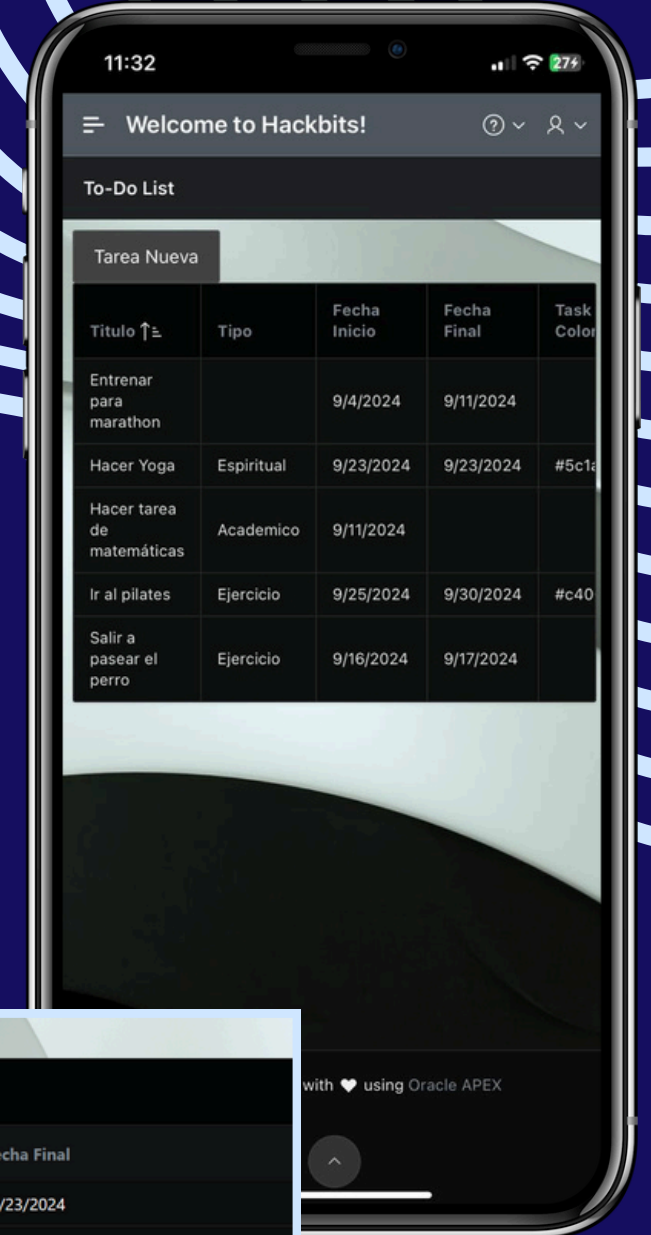

Our calendar is able to show our tasks in a simple and easily digestible manner. In this section you will be able to add and delete tasks as you wish.

You can easily set and see the time period in which your tasks are active in, making for a hassle-free viewing experience.

# TO DO LIST

Our To Do list show us the tasks that we created in a format easier to read. We can edit this tasks by clicking on the checkmark symbol and add new tasks too, just like in the calendar view.

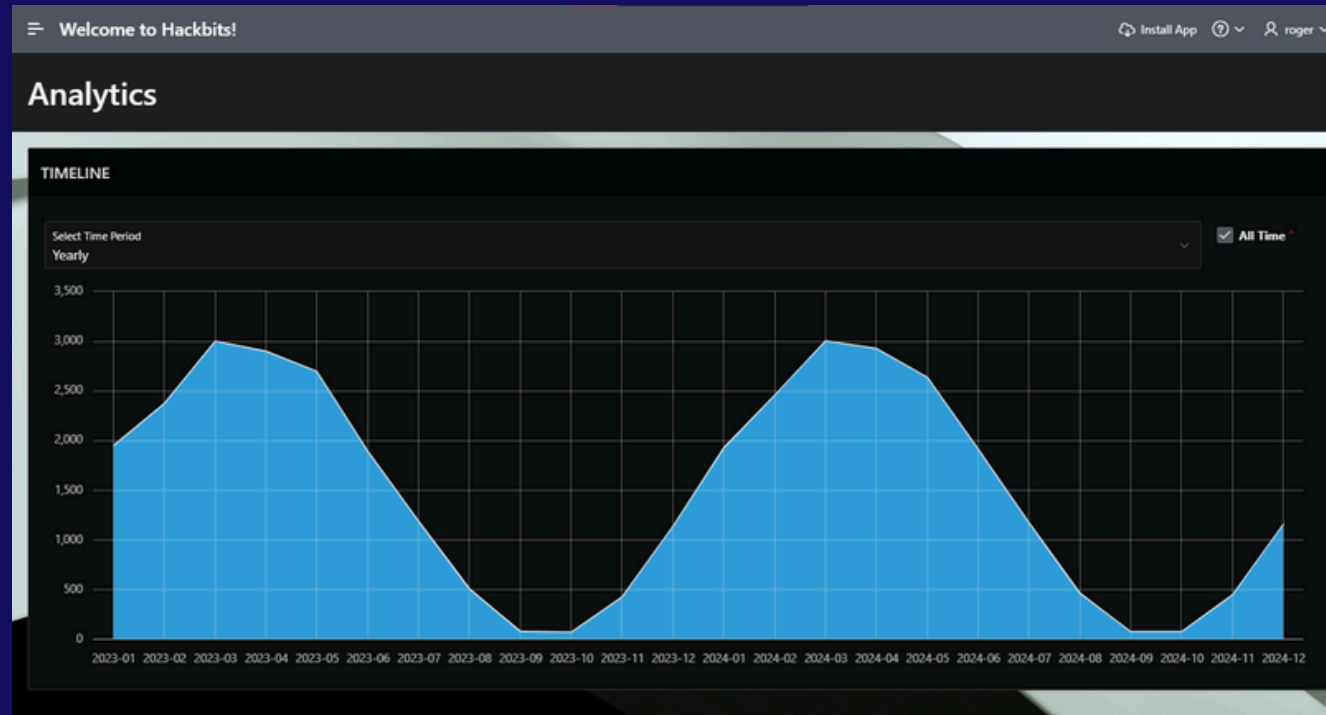

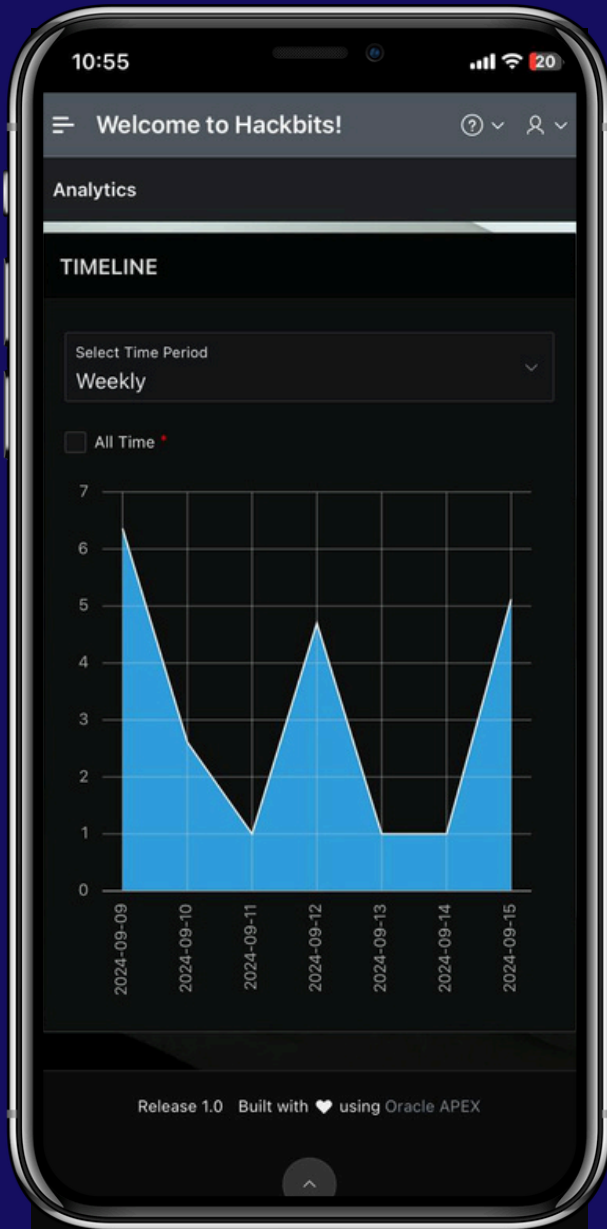

Add Habit				
<div><div>Q</div><div>Go</div><div>Actions</div></div>				
	Título	Tipo	Fecha Inicio	Fecha Final
	Hacer Yoga	Espiritual	9/23/2024	9/23/2024
	Ir al pilates	Ejercicio	9/25/2024	9/30/2024
	Hacer tarea de matemáticas	Academico	9/11/2024	
	Salir a pasear el perro	Ejercicio	9/16/2024	9/17/2024
	Entrenar para marathon		9/4/2024	9/11/2024
1 - 5				

# ANALYTICS

The analytics view shows us the data in a graphics format. This format can be changed by selecting the time period, selecting weekly, monthly, yearly and all time view of this data.

**NOW, WE'LL SHOW YOU  
AN APP DEMO**

# APEX

- ¿Qué tan fácil fue hacerlo con APEX?
- ¿Usarían la aplicación que se desarrolló?
- ¿Qué agregarían a la aplicación si tuvieran más tiempo?
- ¿Considerarían APEX para usarlo en sus próximos proyectos?

**THANKS**
